

### SETUP INSTRUCTIONS

Step 1: Each pole has a number at each end which matches that end with the end of another pole (A). Connect all the poles together with the matching number by pressing the spring post in and aligning it with the hole in the matching pole (B). Frame setup is easiest if poles are assembled on the floor and the frame is laid flat instead of standing up. The center poles don't have any spring posts, so just slide them together. The finished frame should look like figure (C).

Step 2: Take the fabric graphic and make sure the graphic is facing outward, and positioned on the inside of the curve. With the buckles facing downward, put the fabric over one corner, then stretch it to the other side and pull it down over the frame. The fabric will be taut, which is a good time to align the fabric so the graphic is even on the left and right (D).

Step 3: Pull the rest of the fabric down until the buckles start to come around the frame. Pull the fabric around the frame and clip the buckles together. Now that the fabric graphic is on the frame, adjust the fabric as needed to straighten the graphic. The Sophora display is now complete (E).

### PARTS

- (a) Frame poles (22)
- (b) Printed Fabric Graphic (1)
