

Raster Artwork

Definition: Any artwork that is composed digitally of horizontal and vertical rows of pixels to make up an image. Raster files are resolution dependent and cannot be enlarged without losing image quality.

Typical File Types: .psd .tif .jpg .gif .bmp

Important Note: The file types above are always raster images and are never usable for our table throw or chair products.

Vector Artwork

Definition: Two dimensional artwork that is made up of mathematical lines and curves. Vector files are resolution independent and can be enlarged infinitely without losing image quality.

Typical File Types: .ai .eps .ps .indd .pdf .cdr

Important Note: The vector file types shown above can contain raster art. If you are unsure about your files have one of our production specialists verify your artwork.
