

SUPERA GRAPHICS INSTRUCTIONS

Step 1: Starting at the top of the banner, attach the Plastic Graphic Strip to the BACK of the banner using the adhesive. It is easiest to work one side to the other, several inches at a time.

Step 2: Use Web Tape (packaging tape) on the BACK of the banner. Place it 1 inch from the top so it will not interfere with the Metal Profile.

Step 3: Slide the Metal Profile into position.

Repeat steps 1&2 for the bottom of the banner.

Step 4: The bottom of the banner is attached to the Graphic Roller by sliding the Plastic Graphic Strip into position.

Step 5: Place the roller back into the Supera Base and close the top lid securely.

Step 6: Carefully hold the graphic while removing the Tension Pin. If you do not hold the graphic, damage could occur when the pin is removed. Slowly retract the banner into the Retractable Base.
