ZIPPER

STEP 4. When the zipper reaches the bottom the fabric becomes tighter. Pull the fabric firmly with one hand around the bottom tube while zipping the bottom closed with the other hand.

STEP 5. Once zipped closed, the display is ready to stand up. There are openings sewn at the top for installing lights. The electrical cords can be run inside of the graphics and out the bottom where the zipper shuts. Fit the light peg into the hole on top of the tube.
