

### SETUP INSTRUCTIONS

Step 1: Remove the Poles and the metal base from their travel bags.

Step 2: Insert the thinner pole end into the larger pole.

Step 3: Unfasten the screw at the bottom of the large hole. Put the screw through the hole in the metal base and refasten the bottom of the large pole. This will secure the base to the pole.

Step 4: Feed the top of the pole into the spine of the flag.

Step 5: Pull the flag down slowly. You'll feel some resistance when the pole begins to bend at the top. Fasten the Velcro tabs at the bottom to secure the flag in place.
