

SETUP INSTRUCTIONS

Step 1: Lay your graphic face up on a flat surface.

Step 2: Slide the metal profile (B) into the groove of the strip (A).

Step 3: Position Varia.Lux so that the metal pin (C) sticking out one side is on the left. *Don't remove this pin yet.*

Step 4: Attach the Velcro of the very bottom of your graphic to the Velcro on the plastic sheet (D). It's best to place it as straight as possible.

Step 5: Hold the graphic down with one hand and pull out the pin on the left side of the stand with other hand.

Step 6: Gently guide the graphic as it retracts and rolls up inside the stand.

Step 7: If graphic stops retracting, pull up on it quickly and it will retract down again, like a window shade.
